Course Title: Web Application Development   **Date**: 06-04-2022 to 10-04-2022

Name: **Section**:   **Roll #**

ASSIGNMENT # 01

Create an HTML Cover Page with index.html

Add the following requirements to your index.html page:

1. DOCTYPE. Add the doctype for HTML5 as instructed in the video tutorials.
2. Charset. Add the utf-8 charset meta tag as instructed in the video tutorials.
3. Title. Give the document an appropriate title. Remember, the title does not appear on your actual web page, but in the tab at the top of your browser.
4. Headline. Use the largest heading tag to add the title of your project as a headline.
5. Author. Add your name as the author.
6. Line Break. Use at least one line break after the author text.
7. Animation. Add your animation
8. ALT Attribute. Add an alt attribute to your animation image tag.
9. Smaller Headline. Use the second largest heading tag to add the text "Abstract" as a headline.
10. Abstract. Using the paragraph tag, write one paragraph describing your project topic.
11. The abstract should narrow down the overall topic to the specific subtopics that you intend to address and what impact you intend to show.
12. Use the emphasis tag at least once.
13. Use the strong tag at least once.
14. Headline. Use the second largest heading tag to add "Table of Contents" as another headline.
15. Add your profile picture also
16. Ordered List. Create an ordered list of the sections of your website: Purpose, Effects and Impacts, Technical Aspects, Relationship To Data, References. Each section text should be a separate item in the list.
